DETAILED ACTION

Response to Amendment

1. This action is responsive to the Amendment filed 11/7/05. Claims 1-20 are pending.

Response to Arguments

2. Applicant's arguments filed 11/7/05 with respect to the 35 USC 101 rejection have been fully considered but they are not persuasive. Applicant cites several cases including Ex parte Lundgren, Appeal No. 2003-2088 (2005).
3. The PTO has issued "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility." See the USPTO Website, or http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/guidelines101_20051026.pdf.
4. The Guidelines specifically require either a "physical transformation" or "concrete and tangible result" when the instant claimed invention is directed to an abstract idea or solely involves mathematical calculations.
5. Claims 1-6 and 9-15 are directed to a *method* of magnetic field analysis. Claims 7 and 16-20 are directed to a *computer program*. Claim 8 is directed to a *computer program stored on a computer readable storage medium*.

Art Unit: 2857

6. As per claims 7 and 16-20, computer programs, per se, do not fall under any of the statutory classes of invention, namely: process, machine, manufacture, or composition of matter. When a computer program is not stored on an appropriate computer readable medium to enable any underlying functionality to be realized, the computer program is not statutory under 35 USC 101.

7. With respect to all other pending claims in the instant case, there is no claimed "physical transformation" of any kind in any of the claims. Similarly, there is no "concrete, tangible result" seen in the claims; we merely see "receiving...[data, and] calculating [data]." Except for *possibly* dependent claim 19 which refers to "displaying," there is no clear evidence that a concrete, tangible result is utilized in any manner whatsoever.

8. As per claim 8, we must turn to the instant Specification for interpreting the "computer readable storage medium"-limitation:

When the program is to be supplied to such a computer system, the program is stored in a storage medium such as a magnetic disk 61 such as shown in Fig. 6 and a CD-ROM 71 such as shown in Fig. 7. The storage medium distributed and kept is installed in the computer 52 to read the program with a magnetic disk drive or a CD-ROM drive of the computer 52. If the program distributed via a communication network is input to the input means, the program is stored in the storage medium such as a magnetic disk to allow repetitive use of the program.

9. In light of the above, claim 8 may fall under the "article of manufacture" class in that the storage medium may be a magnetic disk or CD-ROM; however, it has the same deficiencies as indicated above for the method claims in that there is no concrete, tangible result.

Claim Rejections - 35 USC § 101

10. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

11. Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

12. Applicant is again urged to see the "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" currently at

[http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/guidelines101_20051026.p](http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/guidelines101_20051026.pdf)

df. See the above analysis.

Conclusion

13. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

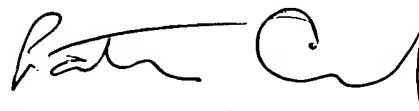

Art Unit: 2857

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
